

BRIEFS 100% COTTON

INDIVIDUALLY WRAPPED – ANTIBACTERIAL LINING

Product Description:

Each box contains 3 individually-wrapped compact conditioned Fresh Control briefs and 3 disposable pouches.

Action:

- The lining inside of the **Fresh Control** briefs makes them **hypoallergenic and naturally antibacterial, anti-fungal and anti-odour**.
- The briefs limit the maceration of the mucous membranes and respect their natural moisture. They preserve the flora of the vulva/perineum area and do not absorb the vulva's natural secretions. They also filter the air flow inside the vulva/perineum area.
- The **Fresh Control** briefs help prevent unpleasant odours.

Indications:

- The **Fresh Control** briefs control minor leaks and help treat vaginal infections.
- They can also replace non-woven undergarments during pregnancy.
- All in all, they compliment all types of sanitary protection perfectly.

Instructions:

The **Fresh Control** briefs can either be washed in 40° water or thrown away neatly in the individual resealable pouches.

Product Advantages:

The **Fresh Control** briefs are real high-thigh underwears. They are very feminine and are light and soft at the touch. They provide comfort both day and night and remain invisible even under the tightest garments. The **Fresh Control** briefs do not contain any chemicals and conserve their anti-fungal, anti-odour and antibacterial properties even after washing.
